Production Engineer 2013

Have you ever wonder why no company ever posted job that challenging your technical ability level? If so, this is probably something you might want to take a look at. We are assembly our team for creating the next generation Cloud product that will work across platform with focus on mobile application space.

You should be flexible, highly innovative and not afraid to learn all sorts of new technologies all at once. We provide the exciting, fun, and flexible work culture as well as great opportunity to learn and work on the cutting edge technologies.

Responsibilities:
- Help design and contribute in our next generation software/hardware platform from Unix based system to Apple iOS software platform.

Qualifications:
- Bachelor degree in Computer Science/Engineering or equivalent. (Little industry experience or new graduate or new graduate is O.K.)
- Knowledge on Unix System fundamental.
- Experience programming in Java or any of these programming languages: Python, Objective C, Ruby, C or C++.
- Experience with Unix shell script like bash or tcsh.
- Understanding of various networking topics such as DCHP, e-mail operations, DNS and VPN.
- Constructive attitude and willingness to work as part of a global team.
- Self starter, good interpersonal skills and effective communication skills.
- Good English skills, both written and verbal.

What would you become? if you join us:
- You would become a Unix god. You will comfortably handle, install, and retool any Unix system to work in any specific domain
- You would become architecture aware designer in Operating kernel, Storage, Network and security side design
- You will throughly know how to design and put high performance public cloud into production system
- You will understand all requirements and what you need to do in term of security and containment design for Cloud system.

Little things you should know about our development team:
- We work on flex time flex dress basis, and we do care about meeting deadline more than when you come to work.
- We love to work together as a team, and part of our team process is about catch others when they fell.
- We love to look at the bright side of everything in the world with humor, and we hope you are too.
