

Network/Storage Infrastructure Engineer 2012

Throughwave (Thailand) Distribution Department is a premier distributor for products ranging from core network switches, wireless network devices, security appliances, and storage systems both NAS/SAN. We're looking for infrastructure engineers who want to excel in IT infrastructure design to help us expand the market in South East Asia.

Responsibilities:

- Responsible for being on the top of technology curve for products and technologies mentioned above.
- Help our partners (system integrator) design the best practice infrastructures for end customers.
- Help act as pre-sale role/pre-sale training for partners.
- Conduct technical training classes for partners and end-customers.
- Help partners implement or control implementation of best practice infrastructures for end customers.

Qualifications:

- At least bachelor degree in Computer Science/Engineering or equivalent (No or little work experience is OK.)
- Have a strong fundamental understanding on networking concept like TCP handshake, routing protocol, routing concept.
- Constructive attitude and willingness to work as a part of a global team.
- Self starter, good interpersonal skills, and effective communication skills.
- Have service mind and a passion to strive for the best.
- Project management skill.
- Problem Solver.

Preferred Skill (Nice to have but not required to):

- Wireless Networking and RF design
- SAN/NAS experience
- Windows Active Directory domain design
- Linux/Unix system administrator
- Network Security
- LDAP
