Software Development Engineer 2012

We are looking for new developer to join our growing developer team working on our new products and services. Java and object oriented programming paradigm will be something you will need to know here. You will help us building the next generation web platform either restless or restful using top tier tools and components. If you wants to explore on the mobile side, our mobile plan including iPhone and Android as our target mobile platform.

Come and work with us if you think you match the following attributes:

- You love to follow up the new technology and be on the forefront of everything.
- You have some knowledge or experience in coding Java or object-oriented.
- You want to become architecture person that can design from backend to web front-end and even in mobile space.

Qualifications:

- Bachelor's Degree in Computer Science/Engineering or related fields. (No or little work experience is OK.)
- Know any of the following language: Java, C, Objective C, C++, Python or Ruby.
- Know what contribute to create web application including the following technoloties: HTML 4.0, CSS2/3, Javascript, Flash, Flex, etc.
- Open mind.
- Some English fluency. (At least you should be able to read the latest SDK release document, right?)

Please send us your resume to job@throughwave.co.th

We are equal opportunity employer, so please refrain from sending us unrelated personal information like age, race, your photo, or marital status.
